MYKYTA STOROZHENKO

Boca Raton, FL | storozh.dev | storozhenkomykyta@gmail.com | +1 (561) 562-9669 | US Citizen

TECHNICAL SKILLS

- Frontend: Next.js, React, React Native, Server-Side React, Expo SDK
- Backend: Node.js, Python, Go, PostgreSQL, Prisma, Auth.js
- Cloud & DevOps: AWS (EC2, S3), Vercel, CI/CD, Docker
- AI/ML: LLM Integration (OpenAI GPT-4, Claude), RAG Systems, Agent Development, Prompt Engineering
- Other: Data Processing, Mobile Development, System Architecture, Queue Management

PROFESSIONAL EXPERIENCE

Machine Perception and Cognitive Robotics Laboratory, FAU

Lead Engineer & Manager | August 2024 - Present

- Architected and launched <u>zikaron.dev</u>, an LLM-powered platform achieving 100 active users and successful academic validation

- Developed <u>ravgpt.dev</u>, implementing parallel processing of 5,500 documents using distributed computing and custom job queuing

- Managed large-scale data collection pipeline processing 25TB across 500 EC2 instances with Docker and Python
- Designed fault-tolerant systems using PostgreSQL for queue management and failover handling

Contrib.com

Software Engineer (Contract) | August 2024 - Present

- Engineered autonomous LLM agent system managing 20,000 domains through research, content creation, and social media management

- Implemented complex playbooks using OpenAI function calling and structured outputs
- Built custom image generation pipeline using Stable Diffusion
- Designed scalable cron job architecture for automated content management

PureCipher

Software Engineer (Contract) | February 2024 - August 2024

- Developed ML-based encryption schemas and steganography API
- Integrated computer vision models and LLMs for secure file processing
- Built robust Python backend services for encryption operations

Independent Developer

Mobile & Web Applications | 2022 - Present

- <u>Justine</u> (2024)
- Built React Native iOS app generating AI-powered stories
- Achieved \$300 MRR with 30 monthly active users
- Implemented complex queuing & prompting system for long-form content generation

- AI-Tarot (2022, Updated 2024)

- Developed iOS app using React Native and Expo
- Integrated live streaming LLM responses
- Generated \$100 MRR with 20 monthly active users

- Mind Map AI (2024)

- Created AI-powered knowledge graph visualization tool
- Implemented RAG system for intelligent note organization
- Built dynamic weight-based relationship mapping

EDUCATION

- Ph.D. Studies in Philosophy of AI (Incomplete), University of Kentucky, 2020-2023 (AI Ethics Publication)
- M.A. Philosophy, Kent State University, 2020
- B.A. Philosophy, Florida Atlantic University, 2018
